There are about 285 million people in the world who are blind or find it difficult to see. However, not many of these people can read Braille. The problem is that Braille books are not cheap. The cost of making a Braille book is four or five times more than any other book. Technology can help blind people. Some of them can listen to news and information on smart phones. There are also "talking books" which blind people can listen to. However, some blind people prefer to read. Now, you can also buy Braille e-books. At the moment, these are difficult to make and expensive to buy. However, scientists are now working on Braille e-books that might be cheaper than Braille books in the future. These e-books might be the best way to help blind people. That would be good news for millions of people.

The boat was one of the first forms of transport. A hundred years ago, the only way to make a journey was by boat. Nowadays, it is possible to fly from one continent to another in a few hours. However, many passengers still have fun while travelling by ship. Although the boat is a rather old-fashioned way of travelling, it has certain advantages. To begin with, the boat is usually more comfortable than a plane or a car. Instead of staying in your seat for the whole journey in the plane or the car, you can go for a walk on the deck, eat in the restaurant or even do shopping on the boat. However, having more space to move around makes a long journey much more pleasant. So, you can travel by boat if you have much time.

In the winter, many animals and birds travel hundreds of kilometres to places with a warmer climate and more food. This journey takes place every year at about the same time. It is common to see birds sitting on walls or telephone wires waiting to travel the long distance between the places where they spend their summers and their winters.

Scientists do not know exactly how they find their way to and from their winter homes. Some people believe that birds depend on their senses, including their sense of smell, to help them find the way. Some animals and birds travel thousands of kilometres. It is surprising that blue whales have been known to travel up to 20.000 kilometres.
